Projects

Nardwuar

I worked on the backend of a mobile application that provides insight on a musical artist through RESTful programming. My work involved database management to organize user account registration, and utilizing various music APIs to return JSON data about an artist.

GPA Calculator

I built a program that provides a clean user-interface (built with Java Swing) for students to specify their grades, credits, and difficulty of their classes from drop-down menus to determine their prospective grade point average.
